

What is claimed is:

**[claim 1]**

A gaming machine comprising:

game result display means for displaying a game result thereon; and

5       beneficial state generating means for generating a beneficial state for a player when a specific game result is displayed on the game result display means;

10       wherein the game result display means includes first display means and second display means arranged at a more front side than a display area of the first display means when seen from a front side of the gaming machine,

      wherein an image displayed on the second display means is generated by synthesizing a plurality of images based on a priority order, and

15       wherein a symbol display area of the second display means through which the first display means is seen and recognized, is realized by displaying a predetermined image with higher priority order among the plural images.

**[claim 2]**

20       The gaming machine according to claim 1, wherein the second display means is constructed from a liquid crystal display device including a liquid crystal panel, light guide means arranged at a rear side of the liquid crystal panel, illumination means for generating light which is guided to the light guide means and reflection means for reflecting light guided to the light guide means toward the liquid crystal panel arranged at a front side of the  
25       light guide means, and

      wherein an area of the reflection means corresponding to the first display means is formed in a light transmittable part.

**[claim 3]**

The gaming machine according to claim 1, wherein the first display means includes a plurality of symbol display parts in which one or more symbols can be variably displayed and displayed in a stop state thereof, and game result leading means operable by the player to stop the symbols  
5 variably displayed is provided, and

wherein a predetermined image is displayed under a condition that variable display of the symbols is able to be stopped by operation of the game result leading means.

**【claim 4】**

10 The gaming machine according to claim 2, wherein the predetermined image is changed within an area corresponding to the light transmittable part.

**【claim 5】**

The gaming machine according to claim 1, wherein non-transparent  
15 color is determined to the predetermined image.

**【claim 6】**

The gaming machine according to claim 1, wherein the liquid crystal panel is set to normally white.
